One of the central themes in this novel is innocence and vulnerability. Dickens is portraying a child experiencing physical exhaustion and emotional dread. Not only is he being forced to work beyond his limits, but he is being constantly beaten up as well. After being displaced from the workhouse, he is taken as an apprentice with the inhumane and savage Sowerberry family. Eventually running away to London and meeting The Artful Dodger and Fagin. Two major characters representing deceit and impurity, teaching Oliver illicit ways to make money for their benefit. There is a clear comparison between the naive nature of the infant with the characters previously mentioned and according to the author, this portrayal of innocence is not only a characteristic of children. It is a powerful tool that allows the protagonist to survive in the midst of the evil around him. “Innocence and suffering: A study of Oliver Twist and David Copperfield”, n.d. Moreover, it can be argued that Dickens is taking a strong position against child labor, he sees the innocence as a gift that must be preserved. Therefore he is advocating the children’s rights and insisting on their protection from the criminal environment. “Oliver Twist and Preserving Childhood Innocence — ‘Prison Voices’”, n.d.

## Conclusion

In conclusion, the author is showing a cruel reality where orphans are discarded, treated horribly and used for personal gains. The contradiction between the purity of the infant and the immorality of the environment he exists within, leaves the reader wondering whether it is truly possible for the goodness to overcome evil.
